slumped glass

## AAG Offers Slumped Glass Options

Artwork in Architectural Glass (AAG) of Good Hope, Ga., offers slumped glass, which is kiln-fired glass that conforms to custom-designed, hand-made molds, producing molded glass creations.

Not only can the design of slumped glass be 100-percent customized, but holes and notches can be provided and the majority of AAG's patterns can be tempered to meet safety glazing codes. Insulating units can also be fabricated to meet exterior glazing requirements. AAG's maximum size is 80 by 140 inches and standard thicknesses are available from  $\frac{1}{8}$  to  $\frac{3}{4}$  inch. In addition, the glass can be colored to match specific requirements.
